Justfit EMS - the smart way to workout

ADVANTAGES

EMS training offers a smart solution for every possible need in fitness and wellness. It is a progressive training method, which assures visible results in a few weeks. One of the best things in EMS training is that one session takes only 20-30 minutes.

Electrical muscle stimulation directly stimulates the muscles with low-strength electrical impulses. While the brain is capable of stimulating a big part of the muscle fibers, the EMS device stimulates nearly 100% of it. This leads to better and safer performance growth than in the case of individually pursued traditional training methods.

Justfit EMS offers a future-proof business solution whether you are a personal trainer, a physiotherapist, or a beauty salon / fitness studio owner.

1 USER

Justfit Pirato MOBILE EMS DEVICE

According to our survey conducted in 2019 (Q3) with the participation of 200+ studios and personal trainers worldwide, the initial investment of the Justfit Pirato returns within a 3 month period.

The Pirato requires little space, so it fits perfectly into a sports bag, which makes it possible to bring the EMS training to the home / headquarters of your VIP clients.

This future-proof turnkey business opportunity shows you how to tackle the challenges of the 21st century.
